

ASSEMBLY INSTRUCTIONS

XL Series
Side chair
AAP-CP310

Read these instructions before starting; follow assembly procedures carefully.

1. Turn seat ② upside down on workbench or table with back of seat towards you. Place frame ③ upside down onto seat and align holes in frame with holes in seat. Attach frame to seat using four phillips hex head screws ④ but do not tighten completely.
2. Turn back ① upside down and align back bracket with holes in plate of frame. Attach back bracket using four socket head bolts ⑥ with hex wrench ⑦. Before tightening make sure gap between seat and back is the same on both sides. Securely tighten four bolts and four screws to frame.
3. Align two holes in back plastic strap with two holes in seat and securely tighten with two phillips pan head screws ⑤. Attach back plastic strap on other side of seat with remaining two screws ⑤ and make sure all four screws are securely tightened.

GENERAL SAFETY INSTRUCTIONS

1. Do not stand on seat.
2. Chair must be on level surface to ensure proper stability.
3. Only use chair when fully assembled.
4. Periodically check fasteners and tighten securely if needed.
5. Never use chair if it does not perform according to this manual.
