Ayuda del producto y partes / Support technique et pièces
A. Seat height adjustment
To raise the seat height, stand up from the chair while lifting the lever (A) under the right side of the seat. To lower the seat height, lift the lever (A) while sitting in the chair.

B. Seat angle adjustment
Push the lever (B) upward. Leaning back will cause the chair seat to tilt backwards. To lock the chair seat in the upright or vertical position, sit upright and push the lever (B) downward.

C. Back angle adjustment
Push the lever (C) upward. Leaning back will cause the chair back to tilt backwards. Push the lever (C) downward. To lock the chair back in the upright, vertical position or sit upright.

D. Tilt tension
Knob underneath seat adjusts angle and ease with which chair reclines to the different weights and strengths to different users. To increase tension, turn knob to the right. To release tension, turn knob to the left.

E. Arm height adjustment
To adjust arm height, push the button on the outside of each arm and move the arm up or down. Release the button to set the height.

F. Sliding seat adjustment
Push the lever (F) upward to allow seat to slide forward or backward. Release handle to lock in desired seat position.

G. Backrest height adjustment
Loose the knob (G) by turning left, then raise the back to desired position. When turn the knob (G) right to tighten the back.

H. Arm width adjustment
To adjust arm width, loosen the switch underneath seat pan on both sides of chair arms. Tighten the switch to fix the width of armrests.

I. Lumbar support adjustment
Raise or lower adjust lumbar support component so that support is at the correct position for the user’s back.
